PRINTING AND PHOTOGRAPHY DIVISION
WEEKLY REPORT FOR PERIOD ENDING
17 February - 23 February 1983I. Items or Events of Major Interest that have Occurred During the Preceding Week

A. Digital Prepress: Representatives from the Bedford Computer Corporation visited P&PD on Wednesday, 16 February. They gave a slide presentation and discussed the Bedford page makeup system and associated digital prepress components. Although Bedford is addressing virtually all elements of P&PD's proposed digital prepress system, their development timeframe does not conform to P&PD's desired implementation schedule.

B. Laser Platemaker: The contractor who performed the site preparation for the laser platemaker is installing the new electrical connections between the transformer and the laser platemaker. Monday, 28 February, is the tentative date EOCOM will send a technician to P&PD to start up the laser platemaker using the new transformer.

C. Video Disc Presentation: A representative from 3M Company contacted P&PD about giving a presentation to Agency representatives on his company's video disc production system. 3M is currently working as a service bureau producing training discs for various government and industry organizations. A tentative date for his presentation is Thursday, 3 March 1983.

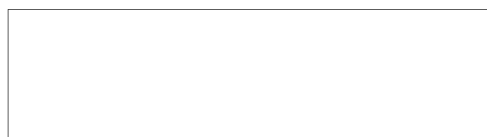

D. Miscellaneous Support:

1. Acme of Skills: Revised proofs of this booklet have been approved by the Public Affairs Division, Office of External Affairs, and a new printing for 10,000 copies is scheduled for March.

2. CAMS II Support: On 23 February, 100 copies of the 850 page priority report CAMS II Processing Segment Baseline Review was delivered to the Office of Data Processing.

II. Significant Events Anticipated During the Coming Week

None
